PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 9.55/10) with experience in full-stack development using MERN, Django, NLP, REST APIs, and database management. Solved 250+ DSA problems across LeetCode and CodeChef and is actively pursuing software development internship opportunities.

EDUCATION

CVR College of Engineering, Hyderabad

B.Tech, Computer Science and Engineering

Sep 2024 – May 2028

CGPA: 9.55/10

Narayana Junior College, Hyderabad

Intermediate (Telangana State Board of Intermediate Education)

May 2022 – June 2024

Score: 987/1000

Personal Projects

AgroVision – AI-Powered Smart Agriculture Platform / React.js, Node.js, Express.js, MongoDB, AI/ML | 2026

- Built a **full-stack MERN platform** enabling farmers to securely manage farm data including **location, area, soil type, and irrigation**, with **JWT-based authentication, role-based access control**, and **RESTful APIs**.
- Designed and integrated an **AI/ML-based crop yield prediction system** leveraging **agricultural and environmental data** to estimate crop production and deliver **data-driven insights** for improved farming decision-making.

CivicVoice – Hyperlocal Civic Complaint Platform / React.js, Node.js, Express.js, MongoDB, Socket.IO | 2026

- Built a **full-stack MERN platform** enabling citizens to report civic issues with **geolocation-based address detection** and **Cloudinary image uploads**, alongside an **administrator dashboard** for centralized complaint search, filtering, and status management.
- Engineered **real-time bi-directional updates** using **Socket.IO**, enabling instant complaint and status synchronization across citizen and admin views, and implemented **JWT-based authentication** with **role-based access control** for citizens and administrators.

MindCare – Digital Mental Health Support System / Django, JavaScript, SQLite | 2025

- Built a **full-stack digital mental health platform** using **Django** with **secure authentication, stress assessment**, and **historical analytics** for tracking users' emotional well-being.
- Developed a **Naive Bayes NLP sentiment analysis** engine for **AI-assisted emotional support** and integrated the **Google Maps API** to help users find nearby **mental health professionals**, emphasizing **ethical and responsible AI**.

Technical Skills

Languages: Java, Python, C

Frontend: HTML, CSS, JavaScript, React

Backend: Node.js, Express.js, Django

Databases: SQL, MongoDB

Tools: Git, GitHub, Ubuntu, Power BI, VS Code

Concepts: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, REST APIs

Achievements and Certifications

- Smart India Hackathon (SIH):** Developed the React.js frontend for a MERN-based environmental education platform aimed at encouraging sustainable habits and climate awareness among students; the project was shortlisted for the next round.
- HackVibe (24-hour Hackathon):** Built a student productivity platform enabling study tracking, timetable management, and progress monitoring; delivered a working prototype within 24 hours.
- DSA Proficiency:** Solved 300+ problems across LeetCode and CodeChef, strengthening problem-solving skills and deepening proficiency.

Training and Experience

Infosys Springboard Virtual Internship

September 2025 – November 2025

Virtual Intern – QuizForge AI

- Developed an AI-powered quiz generation platform using **Django, OpenAI API, JavaScript**, and **SQLite**.
- Integrated the **OpenAI API** to generate customized multiple-choice quizzes based on user-selected topics and difficulty levels.
- Implemented secure authentication, automated quiz evaluation, quiz history, leaderboards, and personalized dashboards.
